ONLY HOPE OF SERBIA NOW SEEMS ARRIVAL OF REINFORCEMENTS FROM SALONIKI WITHOUT DELAY

Most Menacing Circumstance is Flank Move Being Executed by Bulgars

TURKISH CAVALRY CO-OPERATING WITH BULGARIANS IN GREAT BATTLE NOW PROGRESSING AT VELEZE

(By Associated Press.)
LONDON, Oct. 22.—Superior forces of Teutons in the north and Bulgarians in the east are threatening to crush the Serbians. The arrival of strong allied reinforcements from Saloniki is the only hope. The Germans are within 12 miles. A carefully planned flank attack by the Bulgarians is most menacing. The movements of the allies from Saloniki are unknown. Sofia and Saloniki deny the loss of Strumitsa, which means that the Bulgarians have not invaded. It is reported that Turkish cavalry and Bulgarian troops are co-operating, and a great battle is progressing at Veleze, a Macedonian town.
Both sides admit that Riga is endangered in the Russian campaign. The Germans are within 12 miles of the port, and at two places are bombarding the Riga-Dvinsk railroad, depriving the Russians of the means of bringing up supplies or reinforcements.

Teuton Invaders Lose 60,000 Men in Campaign in Serbia to Present Time

BRITISH CASUALTIES SINCE OCTOBER 1 ARE 2285 OFFICERS AND FIFTY THOUSAND MEN OF THE LINE

(By Associated Press.)
LONDON, Oct. 22.—The British casualties published since October 1 total 2285 officers, and 50,072 non-commissioned officers and men. The Times this morning said that it is understood Greece has rejected the offer of the allies. A Nist dispatch said that the invading Teutons had lost 60,000 in dead, wounded and prisoners in the invasion of Serbia. The Serbians have repulsed the invaders, it is reported.

Mexican Soldiers Ambushed and Slain By Yaqui Indian Band on Warpath

FORTY-FOUR TROOPERS KILLED BY REDSKINS, WHO ARE PURSUED BY DETACHMENT OF CARRANZA'S MEN

(By Associated Press.)
TOPOLOBAMPO, Mexico, Oct. 22.—A hundred and fifty Yaquis ambushed 46 Carranza soldiers and killed 44 of them between Los Mochis and San Blas, Sinaloa. Piling the bodies on a railroad bridge, they burned all together. They are now proceeding to the United Sugar plantation at Aguila. Carranza troops are following.

LABOR UNIONS IN ENGLAND ARE GROWING

(By Associated Press.)
LONDON, Oct. 22.—Membership of labor unions in England increased by nearly 7,000 persons during the year 1913, according to a belated report just issued by the registrar general. The total membership at the end of the year was 3,245,000.
This growth, which is far in excess of any previously reported, is attributed to extended propaganda work and improved organization during a period of great industrial unrest. The largest increase occurred in the National Union of Railwaymen, the membership of which more than doubled.
During the same period there was a corresponding increase in the treasuries of the various unions, and at the end of the year the aggregate balances of the labor organizations reached nearly \$33,000,000.

NO LONGER USE FOR THE UNEMPLOYED BODY

CENTRAL ORGANIZATION IN LONDON HAS PRACTICALLY GONE OUT OF EXISTENCE

(By Associated Press.)
LONDON, Oct. 22.—The Central Unemployed Body for London has practically gone out of business because there is no work for it to do. Organized primarily to find work for the unemployed in London it now finds there are no unemployed to find work for. The war, so far from increasing unemployment and poverty, as was generally anticipated when the conflict began, has had the contrary effect.
"After nearly fifteen months of the war," said Mr. Brinsley Harper, president at a meeting of the organization, "there is not only no evidence of distress but there is abundant evidence of abnormally plentiful employment and exceptionally high wages. Nor do the reports we have received indicate that the increased cost of living has led to an increase of poverty and destitution. A partial explanation may be found in the fact that owing to the great demand for juvenile labor young wage-earners have been able to supplement the family income to an unprecedented extent."
Under these circumstances, Mr. Harper explained, it had been decided to close most of the offices of the organization and to retain only enough clerks to keep the machinery at the head office going.

RALLY COMMITTEE OF STUDENTS APPOINTED

EVERYBODY INVITED TO PARTICIPATE IN FUNCTION TO DEVELOP SCHOOL SPIRIT

At a meeting of the associated students of the Tonopah high school held yesterday, President Murphy appointed a rally committee consisting of Gertrude Rippingham, chairman; Elinor Malone, Harold Bowler and James O'Connell. The committee was instructed to provide a means of letting all of Tonopah know that Tonopah high school had a football team, that the team is a good one, and that its first hard game is to be played at Goldfield tomorrow. The best that could be learned of the committee's plans is that all students are to appear in yama-yama costume or pajamas, that autos are to cut quite a figure in the excitement, and that there is to be lots of noise.
Conjectures as to the stunts to be pulled off have taken many shapes. As part of the real business of the rally the team and substitutes to play tomorrow will be announced. This much is established. Whether vivid descriptions of a K K K brigade, or grotesque costume, or of the sky made gory with much red fire, or of a score more fantastic ideas, are well founded, only tonight will tell.
The rally party is to meet at the high school gym at 7:30. From here the town will be invaded and everyone invited to the gym to participate in the formalities of launching the football team that is out to win the championship of the state, and out after it hard.

SUCCESSFULLY PASSES CRISIS

A wire was received this morning from Los Angeles stating that Mrs. Frederick K. Bradshaw, who was taken from here suffering from pneumonia, has successfully passed the crisis. She is in a Los Angeles hospital with her husband and daughter at her side.

ALL OPENINGS UNCHANGED

During the week there were no physical changes in the Jim Butler mine, either in the Wandering Boy or Desert Queen shafts. The openings all showed the same and the tonnage of ore and the values were practically the same as last week.

TIMBER FOR RUSSIA

(By Associated Press.)
LITTLE ROCK, Ark., Oct. 22.—Arkansas mills have contracted to furnish Russia with 300,000,000 feet of red oak, within a few weeks. One order is for 6,000,000 ties, to be used to double-track the Riga-Moscow railroad.

ELECTION LAWS RECEIVED

The Bonanza is in receipt of the new election laws of the State of Nevada, through the kindness of Secretary of State Brodigan. There have been material changes made in the statutes governing elections in this state.

NATIONAL GUARD TOURNAMENT

(By Associated Press.)
JACKSONVILLE, Oct. 22.—National guardsmen, by scoring 2228 out of a possible 2400, won the United Service match in the national rifle tournament.

GREECE REFUSES BRIBE

(By Associated Press.)
LONDON, Oct. 22.—Greece has informed the allies that it cannot accept Cyprus and other proposals in return for co-operation with Serbia.

TODAY AND A YEAR AGO

Official readings of the thermometer by the United States observer at Tonopah:
1915 1914
5 a. m. 52 31
3 a. m. 59 35
12 noon 67 46
2 p. m. 68 51
Relative humidity at 2 p. m. today, 12 per cent.

CHARLTON TRIAL IS AGAIN PROGRESSING

VERDICT IS EXPECTED TO BE REACHED ABOUT NEXT WEDNESDAY

(By Associated Press.)
COMO, Italy, Oct. 22.—The Charlton trial has been resumed. Picardi, chief of the defendant's attorneys, was in attendance. A verdict is expected about next Wednesday. Twenty witnesses, including porters, physicians, and landladies, gave contradictory testimony regarding the life and quarrels of the Charltons.

BODY OF DR. RANSOM HAS BEEN RECOVERED

(By Associated Press.)
SALT LAKE, Oct. 22.—Advices from Wilson, Wyo., tell of the finding of the body of Dr. Clayton Ransom of Mill City, Ore., who was killed recently on a hunting trip by the accidental discharge of his shotgun while climbing over a log. His brother, thinking him kidnapped or murdered, recently offered a reward of \$500 for the finding of his body.

NEW STOPES IN THE JUMBO EX. MINE

HIGH GRADE ORE NOW BEING EXTRACTED FROM 930-FOOT LEVEL

Two new stopes have been started on the contact segment of the big ore body in the Jumbo Extension mine and the operations in each are being attended by highly satisfactory results. Stope 534 is being advanced above west drift 534 on the 918-foot level on 7 feet of 25 ore while a like width of 320 material is being broken in stope 541 above the east drift on the 840-foot level, says the Goldfield Tribune.
Four feet of 55 ore is being extracted in the extension of east drift 535 on the 918-foot level while five feet of 20 material is being broken down in advancing east drift 524 on the 800-foot level. This latter drift is approximately 250 feet in length and has exposed commercial ore for its entire length. Incidentally, it is proving the continuity of the ore body steadily eastward in a highly pleasing manner.

NEVADA MAY BE BIG POTASH PRODUCER

Production for the first time in the United States of commercial mineral potash, for which, in the past, Americans have spent millions of dollars abroad annually, has been announced by Secretary Lane of the Interior department. A report has reached the department from a special agent of the geological survey telling how, by a simple process, potash had been produced from alunite found in a great vein in Piute county, Utah.
As alunite is known to exist in large quantities in Utah, Colorado, Nevada, California and Arizona, Mr. Lane believes that the discovery assures the country of an adequate supply of potash for agricultural purposes and for use in the manufacture of explosives. Statistics show that imports of potassium salts from Germany amounted to \$15,000,000 in 1913, the last year for which figures are available.
The Utah alunite experimented with is in a vein 10 feet wide, which has been traced for about 3500 feet. Reports show that more than 200 tons of the mineral have been milled, producing two tons of 99 per cent pure potash. At the present time there are 10,000 gallons of alunite containing large amounts of potash salts in the course of evaporation.

NOTARY APPOINTED

William McClure Gotwaldt of Tonopah was yesterday appointed a notary public by Governor Boyle.

TEXAS DECLARES AN EMBARGO ON STATE

SMELTING AND REFINING PLANT SEIZED FOR FAILURE TO WORK GOVERNMENT ORE

(By Associated Press.)
EL PASO, Oct. 22.—An embargo has been declared from Marfa, Texas, and Columbus, N. M., enforceable at the discretion of the customs authorities. W. E. Miller, secretary of the Arizona Copper company, and Y. F. Pantland, a director from Edinburgh, have arrived to attend the managers' and strikers' conference.
From Chihuahua it is reported that General Avila is preparing to operate the American Smelting and Refining company's plant, following confiscation for failure to work "government ores."

SPLENDID OUTLOOK FOR NEW YORK'S FUTURE

(By Associated Press.)
LONDON, Oct. 22.—A budget providing for a surtax of 50 per cent of the profits of British companies has caused several South and Central American mining companies' representatives to remove to New York. It is claimed that unless the tax is rescinded New York will become the world's mining capital, instead of London.

BIG FIND MADE IN THE GOLDFIELD SIMMERONE

LEDGE ASSAYS WELL UP INTO THE HUNDREDS OF DOLLARS TO THE TON

A big strike is reported to have been made last evening in the Simmerone mine in Goldfield, according to H. C. Cutler, Gurney Gordon and Walter Trent, three of the owners, who passed through Tonopah this morning.
The ledge, which is several feet in width, is reported to assay up to above \$500. The heaviest values are on the foot wall. The stock has advanced from 5 cents to 16 cents a share.

TROOPS ORDERED TO BORDER

(By Associated Press.)
WASHINGTON, Oct. 22.—The 28th infantry, stationed at Galveston, has been ordered to Harlingen, Texas, to protect small border posts like Ojo Agua.

CRUSHED TO DEATH

Peter Henry, an old-time resident of Humboldt county, was run over by a wagon near the old Blackbird mine in Central district Sunday afternoon and died next morning as the result of his injuries.

WILL GO AGAINST ALLIES

(By Associated Press.)
BROWNSVILLE, Oct. 22.—Jose Garza, the Carranza consul here, has announced that it is the intention to send General Rugenio Lopez against the bandits on the Mexican side.

FOUR STEAMERS SUNK

(By Associated Press.)
STOCKHOLM, Oct. 22.—A British submarine in the Baltic has sunk four German steamships.

PRONOUNCED THE SAME

When the fire department is sent out to reduce the dust nuisance on Brougher avenue and Main street, it is suggested that it use hoses as well as hoes.

GREECE WILL NOT ACCEPT

(By Associated Press.)
ROME, Oct. 22.—It appears unlikely that Greece will accept the allies' offer, but will maintain an armed neutrality instead.

HOTEL GUESTS ROBBED

(By Associated Press.)
SAN FRANCISCO, Oct. 22.—The second story suites of the St. Francis hotel have been robbed of jewelry valued at \$10,000.

WEALTHY ENGLISHMAN BRUTALLY MURDERED

(By Associated Press.)
DENVER, Oct. 22.—George Flaragrad, an Austrian, has been arrested here for murdering George Gray, an Englishman, August 25, in the railroad shops. The police say that Flaragrad had been killed in the European war. In revenge he pushed Gray into the machinery. Gray is reported to have been a member of a wealthy family.

SERIOUS ACCIDENT BEFALLS C. HERTEL

Clem Hertel, who drives a delivery car for the Hall Liquor company, met with a serious accident this morning, while making his rounds. He was stepping out from the street to the sidewalk to deliver two siphons. He slipped and the bottles exploded with a loud report when he hit the sidewalk in front of the Europa saloon. Mr. Hertel sustained a number of cuts from flying glass, the most serious being a gash in his left wrist, from which he lost considerable blood. Dr. McLeod was compelled to place him under the influence of chloroform when drawing up and reuniting the severed ligaments. It will be some time before he will be able to return to work.

INCENDIARY FIRES ARE AGAIN STARTED

AFTERMATH OF THE FORMER TROUBLES IN THE HOP FIELDS OF CALIFORNIA

(By Associated Press.)
SACRAMENTO, Oct. 22.—Four incendiary fires were started simultaneously at midnight on the Horst Brothers' hop ranch, east of here across the American river, causing a loss estimated at \$35,000. The telephone and power wires were cut, to prevent the calling of help or pumping of water. A messenger, driving here, refused to stop at the command of seven armed men. Kilns, pressrooms and warehouses were fired.

TARVIA CONTINUES TO CLAIM ITS VICTIMS

ITS SUMMER SCOURGE OF HAY FEVER NOW POLITELY KNOWN AS LA GRIPPE

Tonopah is a town of seven thousand people and it doesn't possess a single requirement worth mentioning for the vast sum of money which it pays out in the form of town taxes, to say nothing of the special bond interest and the erstwhile town licenses.
So long as the wind doesn't blow, the tarvia scourge doesn't particularly manifest itself, but the breezes are almost ever constant in this draw high up in the hills between two plains, where the rising and descending sun daily causes inequalities in temperature which result in the purifying breezes being swept through the town.
In the opinion of many people with whom the Bonanza has conversed, it would be a sad state of affairs if the breezes did not blow, for there would be a pall of stench hanging over the town from its unsanitary cesspools.
One of the members of the board, since he was elected to that office, sunk a shallow cesspool in his back yard, which is used from three residences. If he had been a public spirited person, one careful of his own health, that of his family and of his neighbors, he certainly would have connected with the public sewer system.
But, thank Heaven, the breezes blow and, while they waft away the disease breeding germs that otherwise would float in the air until they are inhaled and make jobs for the doctors, the undertakers and the tombstone makers, they also pick up from the streets the finely divided, nasty, black irritating dust that results from the deposition of a slimy sort of tar that the commissioners at a cost of several thousand dollars ruined the streets with last spring. Together with this tarvia dust there is borne

TONOPAH EXTENSION COMING INTO ITS OWN

WITHIN FOUR MONTHS ALL THE PROPERTIES WILL BE CONNECTED AND DEVELOPED

Tonopah Extension has undergone a very marked revival on the stock board recently, particularly today, even selling up to and being sustained at \$2.60, a price from which it broke when recent litigation was begun, despite the fact that this property is doubtless the biggest silver mine in the world today, as the Bonanza has so often asserted and has presented statistics in proof.
The management was interviewed this afternoon and the statement was made that there were no sensational physical changes in the property, but that the development work continued to show up increased bodies of ore for stopping.
Victor is one of the component parts of Tonopah Extension at present and the east drift from the bottom level crosscut is still in merchantable ore, while ore is being taken from the Murray through the Extension shaft. Within about two months the Murray vein should be reached in the Victor crosscut and in two more months it should connect with the Extension workings, when the Victor and the two Extension shafts will all be used for development work and for the extraction of ore.

EXTENDING THE ROLLS

It was a nice little job that County Auditor and Recorder Grimes jumped into upon his return from his vacation trip. He is now up against extending the county assessment rolls, as a result of the action by the state board of revenue. This is an intricate and responsible task.

OLD INDIAN WOMAN DIES

Mollie Jones, one of the oldest Indian squaws in Carson, died Tuesday and was buried yesterday. It is said she was nearly 100 years old.—Appeal.

on the breezes the dirt that the commissioners put on top of the tarvia to conceal their criminal ignorance and bury their folly.

It uplifts in such a cloud that it is sometimes impossible to see across the main business thoroughfare. Some of this dust settles back into place, but a goodly portion is borne into the residences and business houses. It could be swept out if it were ordinary dust, but it has a glutinous character, due to the tar basis, and it clings and blackens.

A considerable amount adheres to the clothing and the cuticle of pedestrians, while it is great fun to get into the hair and defy ordinary warm water and soap to remove it.
That, however, is not the worst feature. Since the tarvia was placed on the streets by the blundering commissioners on advice of their legal adviser or his third assistant's clerk, there has developed a new disease. It was known as hay fever and continued all summer, having hundreds of unfortunate victims. There isn't a spear of hay raised in God knows how many miles of this city and there are no other plants that throw pollen into the air, so this new disease is easily determined as tarvialitis.

When cooler weather came the malady continued. It was no longer termed hay fever, but gained the appellation of la grippe, but it is no more like the Russian influenza than a dark lantern resembles an arc light. However, we still have it with us and it is growing worse. It is particularly
